Riphah School of Computing & Innovation

Updated FYP Proposal Evaluation Rubrics (Aligned with Template v1.1)

Category: Product Development Project (CS, SE, IT)

These rubrics have been explicitly updated to align with the structural requirements of 'Template03 - Project Proposal & Plan -v1.1'. Key additions include evaluations for the Executive Summary, Functional Requirements (FRs)/User Stories, Work Breakdown Structure (WBS), Roles & Responsibilities Matrix, and UI/UX Wireframes.

Detailed 14-Criteria Evaluation Matrix

Domain A: Problem Identification, Background Study & Business Feasibility (40 Marks)

Criteria & Max Marks	Unsatisfactory (0–1)	Developing(2–3)	Proficient / Excellent (4–5)	Marks
1. Executive Summary & Problem Formulation (10 Marks)	Missing executive summary. Problem statement is vague, undefined, or lacks real-world relevance.	Summary is present but lacks core highlights. Problem is stated but lacks clear context or justification.	Clear executive summary covering core functionality. Precise, well-formulated problem statement addressing a clear need.	**(10 Marks)**
2. Proposed Solution (FRs, NFRs & User Stories) (10 Marks)	No clear functional requirements or user stories. Solution is generically described.	Lists basic features but lacks standard user stories or clear non-functional requirements (NFRs).	Explicitly details Functional Requirements traceable to user needs, clear User Stories, and NFRs (performance, security, etc.).	**(10 Marks)**
3. Existing System & Competitive Analysis (10 Marks)	Minimal background study. Fails to review current market solutions or competitors.	Summarizes existing solutions but lacks rigorous competitor analysis or clear gap identification.	Comprehensive critical synthesis of state-of-the-art competitors/existing systems, explicitly establishing the technical/functional gap.	**(10 Marks)**
4. Target Audience & Value Proposition (5 Marks)	Target users are unidentified. No clear value proposition stated.	Audience is overly broad (e.g., 'everyone'). Value proposition is generic.	Clearly defined user personas/target market with a compelling, well-articulated value proposition.	**(5 Marks)**
5. Project Plan (WBS, Gantt & Roles Matrix) (5 Marks)	No WBS, Roles Matrix, or Gantt chart provided. Timeline is completely missing.	Basic timeline provided but missing explicit WBS deliverable breakdowns or unclear roles & responsibilities.	Detailed Work Breakdown Structure (WBS), clear Roles & Responsibility Matrix, and structured Gantt chart with task assignments.	**(5 Marks)**

Domain B: Technical Design & Methodology (35 Marks)

Criteria & Max Marks	Unsatisfactory (0–1)	Developing	Proficient / Excellent(4–5)	Marks
7. System Architectural Design (10 Marks)	No architecture diagram or wireframes provided; design approach is vague.	Conceptual block diagram present, but system interactions or low-fidelity mockups are missing/unclear.	Clear multi-tier architectural diagram detailing modules, AND low-fidelity wireframes/mockups for key screens.	**(10 Marks)**
8. Implementation Tools & Tech Stack (10 Marks)	Tech stack is unspecified or completely inappropriate for the proposed solution.	Technologies are listed but lack justification regarding why they were chosen.	Well-justified choice of modern frameworks, languages, and databases, proving high technical feasibility.	**(10 Marks)**
9. Scope Boundaries (In-Scope/Out-of-Scope) (10 Marks)	Scope is unbounded, unrealistic for the project timeline, or out-of-scope items are ignored.	Scope is defined but boundaries are blurry or slightly overly ambitious.	Highly precise definition of what the system will and will NOT do, detailing major modules accurately.	**(10 Marks)**
10. Risk Assessment, Testing & Integration (5 Marks)	No risks or testing/integration plans identified. Assumes flawless execution.	Lists generic risks without actionable mitigation or testing strategies.	Identifies specific technical risks, fallback plans, and concrete integration/testing strategies.	**(10 Marks)**

Domain C: Oral Defense & Presentation (25 Marks)

Criteria & Max Marks	Unsatisfactory (0–1)	Developing (2–3)	Proficient / Excellent (4–5)	Marks
12. Presentation Organization & Visual Quality (5 Marks)	Unstructured, cluttered slides, unreadable text, missing diagrams.	Logical structure but visual aids are standard or overly text-dense.	Exceptionally structured slides with clean layout, high-contrast visual diagrams, and executive-ready aesthetics.	**(5 Marks)**
13. Technical Communication & Delivery (10 Marks)	Reads directly from slides, poor time management, weak grasp of technical vocabulary.	Clear delivery but relies on notes; adequate time management, unbalanced team speaking roles.	Fluent, engaging delivery, precise technical terms, perfect time management, and balanced team participation.	**(10 Marks)**
14. Q&A Response & Design Defense (10 Marks)	Unable to answer technical questions; defensive, evasive, or	Answers surface-level questions but struggles to justify deep	Demonstrates deep mastery; logically defends technology choices, scope	**(10 Marks)**

	complete reliance on one member.	architectural or design choices.	boundaries, and architecture against panel scrutiny.
