Riphah School of Computing & Innovation

Detailed FYP Proposal Evaluation Rubrics (14 Criteria)

Category: Innovation & Entrepreneurship Project

This expanded rubric breaks down the Innovation & Entrepreneurship Project proposal evaluation into 14 distinct criteria across 3 major domains: Proposal Written Report & Business Feasibility (50 Marks), Technical Solution & MVP Design (25 Marks), and Oral Pitch & Defense (25 Marks). It provides fine-grained scoring criteria specifically tailored to tech-startup and entrepreneurial academic standards.

1. Comprehensive Score Breakdown (100 Marks)

#	Evaluation Domain & Specific Rubric Criteria		Marks
1	**Domain A: Problem Identification, Background Study & Business Feasibility (50)**	- Problem Identification & Market Need	8
2		- Value Proposition & Objectives	7
3		- Market Research & Competitor Analysis	10
4		- Business Model & Revenue Strategy	8
5		- Target Audience & Customer Segmentation	7
6		- Project Plan, Timeline & Launch Strategy	5
7		- Document Structure, Formatting & AI Declaration	5
8	**Domain B: Technical Solution & MVP Design (25)**	- Proposed Solution & MVP Scope	8
9		- System Architecture & Technology Stack	7

10		- Financial Feasibility & Cost Estimation	6
11		- Innovation & Commercialization Potential	4
12	**Domain C: Oral Pitch & Defense (25)**	- Pitch Deck Organization & Visual Aids	5
13		- Entrepreneurial Pitching & Communication	10
14		- Q&A Response, Business & Tech Defense	10
	TOTAL SCORE		**100**

2. Detailed 14-Criteria Evaluation Rubric Matrix

Domain A: Problem Identification, Background Study & Business Feasibility (50 Marks)

Criteria & Max Marks	Unsatisfactory (0–1)	Developing (2–3)	Proficient / Excellent (4–5)	Marks
1. Problem Identification & Market Need (10 Marks)	Vague or missing problem; fails to identify a real-world market need or customer pain point.	Broad problem definition; market need is stated but lacks empirical evidence or clear scale.	Precise, well-formulated market problem validated by clear evidence, survey data, or market indicators.	**(10 Marks)**
2. Value Proposition & Objectives (10 Marks)	Objectives missing or unmeasurable; fails to articulate what value the product provides.	Objectives defined but generic; value proposition is weak or not directly tied to the target problem.	Explicit, compelling value proposition directly addressing the identified market gap; highly specific project objectives.	**(10 Marks)**
3. Market Research & Competitor Analysis (10 Marks)	Minimal to no market research; completely ignores existing solutions or direct competitors.	Lists some competitors but lacks deep analysis of their shortcomings or the target market sizing (TAM/SAM/SOM).	Comprehensive competitor analysis; explicit differentiation strategy; clear sizing of target market based on credible sources.	**(10 Marks)**
4. Business Model & Revenue Strategy (8 Marks)	Lacks a clear business model; no logical plan for how the product will sustain itself or generate revenue.	Mentions a revenue stream (e.g., ads, subs) but lacks justification or alignment with target audience willingness to pay.	Clear, viable Business Model Canvas elements outlined; realistic, justified revenue strategy aligned with market standards.	**(8 Marks)**
5. Target Audience & Customer Segmentation (7 Marks)	No target customer identified, or audience is unrealistically broad (e.g., 'everyone').	Identifies a target audience but lacks clear segmentation, persona definition, or adoption rationale.	Highly specific, well-researched target customer segment with a clear initial adoption or pilot launch plan.	**(7 Marks)**
6. Project Plan, Timeline & Launch Strategy (5 Marks)	No Gantt chart or milestones; completely unrealistic timeline for product development.	Basic timeline provided but lacks clear phase breakdown between MVP development and pilot launch testing.	Detailed Gantt chart mapping specific technical milestones, MVP completion, and a concrete pilot/launch strategy.	**(5 Marks)**

Domain B: Technical Solution & Scope (25 Marks)

Criteria & Max Marks	Unsatisfactory (0–1)	Developing (2–3)	Proficient / Excellent (4–5)	Marks
8. Proposed Solution & Scope (5 Marks)	Vague solution; no clear distinction between core features and future nice-to-haves.	Solution proposed but functional requirements are generic; lacks clear user stories driving the scope.	Clear, tightly scoped Minimum Viable Product (MVP); excellent user stories and functional requirements mapping.	(5 Marks)
9. System Architecture & Technology Stack (7 Marks)	No architecture diagram or technology stack provided; technical feasibility is highly questionable.	Conceptual diagram present, but technology choices are poorly justified or missing key layers.	Professional system architecture diagram; well-justified technology stack capable of supporting the MVP and scaling.	(7 Marks)
10. Financial Feasibility & Cost Estimation (6 Marks)	No hardware, software, or operational budget provided.	Basic costs listed but misses key expenses (e.g., cloud hosting, APIs, marketing, payment gateways).	Comprehensive cost estimation including development, operational, and customer acquisition costs; demonstrates financial awareness.	(6 Marks)
11. Innovation & Commercialization Potential (7 Marks)	Direct clone of an existing app with zero unique features or local market adaptation.	Incremental innovation; viable but lacks a strong competitive moat or scalability.	High commercial potential; clear unique selling proposition (USP); highly scalable technology-based solution.	(7 Marks)

Domain C: Oral Pitch & Defense (25 Marks)

Criteria & Max Marks	Unsatisfactory (0–1)	Developing (2–3)	Proficient / Excellent (4–5)	Marks
12. Pitch Deck Organization & Visual Aids (5 Marks)	Unstructured, text-heavy slides; missing business model or architecture visuals.	Logical flow but visually unengaging; lacks clear mockups or financial charts.	High-impact pitch deck; excellent use of wireframes/mockups, clean data visualizations, and professional typography.	**(5 Marks)**
13. Entrepreneurial Pitching & Communication	Reads from slides; lacks enthusiasm; poor time	Adequate delivery but lacks persuasive	Compelling, persuasive pitch; excellent hook; demonstrates deep	**(10**

(10 Marks)	management; fails to hook the audience.	energy; passable time management.	passion and professional communication; perfect timing.	**Marks)**
14. Q&A Response, Business & Tech Defense (10 Marks)	Unable to defend business model or tech choices; evasive or defensive.	Answers surface-level questions but struggles with deep technical feasibility or market acquisition queries.	Demonstrates deep mastery; flawlessly defends revenue models, competitor differentiation, and technical architecture.	**(10 Marks)**
